## *Dean's Note*

On behalf of the College of Engineering, I would like to congratulate all of our graduating students for reaching this important milestone. You can be very proud of your achievement, earned through hard work and perseverance during an especially challenging time.

The troubling events of the past year cause us to reflect on the role we can play in addressing challenges faced by individuals and communities within our society. As you embark on the next stage of your studies or professional career, I hope you will draw upon your learning and experiences at Berkeley to effect positive change in the world. Remember that the most successful leaders bring out the best in others so their teams can achieve beyond expectations, and that organizations that include and value a diversity of perspectives and thinking achieve better outcomes. I am optimistic that, if each of us fosters inclusive excellence in our academic and professional endeavors, we will collectively shape a better future for all.

Wherever your life takes you, I hope that you will stay connected to the larger Berkeley Engineering community, which includes more than 71,000 alumni around the world. Online networking groups, including the @cal Alumni Network, will link you to fellow alums and can lead to new relationships and opportunities in your journey.

I am wishing you all the best—and many more celebrations of your accomplishments in the years to come!

With felicitations and warm regards,

—Tsu-Jae King Liu, Dean and Roy W. Carlson Professor of Engineering

## *Pledge of Ethical Conduct for Engineers*

We, the graduating engineering Class of 2021, in recognition of the importance of our technologies in affecting the quality of life throughout the world, and in accepting a personal obligation to our profession, its members and the communities we serve, pledge to commit ourselves to the highest ethical and professional conduct. Throughout our careers, we will consider the ethical implications and the impact on safety, health and welfare of the public and the environment of the work we do before we take action. While the demands placed upon us may be great, we make this declaration because we recognize that individual responsibility is the first step on the path to a better world for all.
